

Dear Evan Perkowski,

Contributed oral session scheduling has been finalized for the 2022 ESA & CSEE Joint Meeting in Montréal.

### **About This Presentation**

Abstract ID: 1223758

Abstract Title: "Soil nitrogen availability increases the positive effect of aridity on water use efficiency"

### **Session Information**

Contributed Talk - Biogeochemistry: Biogeo Patterns Along Environmental Gradients 1

Session Date: Thursday August 18, 2022

Session Time: 8:00 AM - 9:30 AM Eastern Time

We will launch this year's meeting platform with more detailed program information soon. You will be able to build a personal schedule on the meeting platform to help plan out your week. There will also be a new meeting app this year that will be available closer to the meeting. We will send out information to all presenters as these become available. In the meantime, you can preview key parts of the meeting schedule as two PDFs: [Invited paper sessions \(symposia, organized oral, and Inspire\)](#) and [workshops, short courses, and special sessions](#).

### **About the 2022 Joint Meeting**

This year's annual meeting is a joint meeting with the Canadian Society for Ecology and Evolution (CSEE). Members of CSEE will be able to register for the meeting at the ESA member rate.

ESA is closely monitoring the developing situation with COVID-19 and the omicron variant. We continue to plan for an in-person meeting in Montréal. All speakers with accepted abstracts should plan to attend in person in Montréal. Unfortunately we cannot accommodate remote presentations. There will be a limited virtual program offering workshops, short courses, and social events to complement the in-person scientific program. If the situation changes and an in-person meeting is no longer possible, the meeting will be virtual, with all sessions held online. If ESA's meeting format changes, we will notify all speakers by email.
